young man 140

Zurich 99

"The scientist's audacity, spurred on by faith, is revealed in the amazing results that emerged from the rigorous investigation of an intellect made expert by the great love of truth. ... the famous expert on the Holy Shroud offers a painstaking analysis of the countless numismatic images that he shows dependent on the visible imprint of Christ as witnessed in the Sacred Linen. ... To him, my esteem, my gratitude and by virtue of the priesthood my personal blessing."

Don Lieto Massignani

**Professor of Sacred Scripture and Doctor of Medicine and Surgery
Retired from Facoltà Teologica dell'Italia Settentrionale-Padova, Italy**

"Giulio Fanti's work helps to expand the Shroud's history, which aids in validating its authenticity as the true burial cloth of Christ."

Robert A. Rucker

**Retired from Pacific Northwest National Laboratory, USA
Independent researcher with the Shroud Research Network, USA**

"Yours is a more than ambitious project ... There are innovative declarations that will have to be investigated and verified also by numismatic and art history experts."

Anna Gannon

**Early medieval art historian
Emeritus fellow of St Edmund's College, Cambridge, UK**

Numerous studies have been carried out on Byzantine coins, but there are still no univocal interpretations on the details of the figures represented there and in particular on those relating to Jesus Christ. The information derived from the studies on the Holy Shroud, the most important Relic of Christ in Christianity, has clearly resulted in some new interpretations.

This is the first book in the world that deals extensively with the effigy of Christ, despite being the most sought after and collected by numismatists. Furthermore, the book relates the different images of the Redeemer on Byzantine coins with the image of Jesus Christ on the Shroud, the most important Relic of Christianity. The numerous collectors will therefore be interested in having not only a numismatic analysis of these coins but also a historical-religious study. This book, which should be understandable to everyone, demonstrates the strong influence that the Shroud had in the Byzantine era.

Giulio Fanti is associate professor of mechanical and thermal measurements at the Department of Industrial Engineering, University of Padua, Italy. Since 1997, he has directed his interest to the Shroud, especially with reference to the still scientifically inexplicable body image impressed on it. Prof. Fanti was responsible for university research projects concerning the most important Relic of Christianity and has headed for more than 15 years the Shroud Science Group, consisting of more than 100 dedicated scientists. He has published more than 200 scientific articles in international journals and has authored 10 books and over 100 scientific articles on the Shroud.
