

# Index

- ab initio 8, 223, 240, 242, 246, 250, 252-253, 255, 257-258  
adhesion 2, 108, 112  
AFM (atomic force microscopy) 47, 68, 142-144, 214  
aggregated nano-elements 5, 175  
Anderson's algorithm 219  
anisotropy 180, 190-191, 220, 222  
atomic component 211-212, 217, 224, 230, 232, 265, 273, 275, 287, 289-290  
atomic simulation 8, 265, 267, 271  
atomic stress 227-229, 268, 271, 277  
  
band structure 223, 248-250  
B-criterion 273-275, 279-280  
BEM (boundary element method) 7, 14, 49, 137, 139, 193  
bending test 6, 47-48, 55, 149, 204  
bilayer bending test 49  
bilayer tensile test 49  
bond-order potentials (BOP) 222  
Born stability criteria 273, 275  
bulge test 48-49, 60, 67, 108  
  
cantilever method 107, 140  
carbon nanotube (CNT) 1, 176-177, 211, 214-215, 237-238, 248, 252  
charge density distribution 243, 245, 247  
constitutive equation 5, 8, 63, 71, 73, 77-78, 83, 113  
compact tension test 106  
  
compression test 56  
crack growth 5, 11, 15, 25-26, 31-36, 90, 110, 114-125, 127, 146, 194, 204-205  
crack initiation 29, 119, 122, 133-141, 145-151, 155-158, 160-168, 194, 199-200, 203-205, 268  
crack propagation 15, 31, 33, 99, 102, 109-113, 118, 121, 133, 160-161, 265, 283  
creep 4, 6, 19-22, 27, 30, 32, 35, 41, 46, 71-76, 79, 90, 119-123, 125, 127, 162-167  
critical strain 248, 255, 259, 275, 277, 279, 283  
critical stress 205, 279  
critical stress distribution 138-139, 271  
critical stress intensity 134, 160  
crystallographic orientation 44, 82, 177  
CZM (cohesive zone model) 160-161  
  
DC plasma-enhanced chemical vapor deposition 176  
DDD (discrete dislocation dynamics) 60, 83-85  
DFT (density-functional theory) 223, 249  
DFPT (density-functional perturbation theory) 279  
deformation mode 13, 283, 285  
delamination crack 35, 102, 142, 148, 267-268  
design of film property 190

- discrete dislocation dynamics 8, 60, 83  
 discrete structure 3  
 DOD (dynamic oblique deposition) 176, 180, 183, 190, 193  
 ductile island 142, 144  
 Dundurs parameter 23, 28  
 elasto-plastic property 63, 67-68, 77  
 electronic structure 3, 233, 245-248  
 embedded atom method (EAM) 221, 228, 231, 274  
 empirical potential 8, 220-221, 223  
 EMT (effective medium theory) 228  
 environment-assisted crack growth 125, 127  
 energy bandgap 249, 251-252  
 energy release rate 15-16, 18, 25, 29, 99-100, 102, 104-105, 110, 112, 115, 125-126, 160  
 external structure 2-3, 237-239, 242, 256  
 fatigue 6, 8, 21, 32-36, 46, 90, 114-119, 124, 127, 165-169  
 fatigue crack growth 32-34, 36, 115-118  
 fatigue crack propagation 33  
 FEM (finite element method) 7, 14, 26, 49, 52, 64-65, 68, 73, 79-80, 85, 145, 155, 158, 161, 165, 192-195, 203, 267-268, 271  
 ferroelectricity 249, 253-256, 258-259  
 FIB (focused ion beam) 55-56, 68, 77, 89, 151, 162, 185  
 film stress 52-53, 99  
 first-principles 8, 162, 223-224, 232, 239, 245, 249-250, 279  
 four-point bend test 104-105  
 fracture criterion 3, 41, 162, 266  
 fracture energy 161  
 fracture mechanics 2, 5, 9, 11-12, 14-18, 23, 27-28, 31-32, 97, 104, 106, 110, 113-115, 119, 127, 133, 137, 140, 146-147, 156, 160, 162, 165-166, 195, 228, 265, 268, 271  
 fracture mechanics concept 14, 97, 110, 133, 137, 160, 268  
 fracture process zone 161, 268  
 fracture toughness 31-33, 36, 86-87, 89, 97-99, 101-102, 104-105, 109-110, 112, 118, 125  
 fracture strength 9, 41, 46, 90, 192  
 free-standing 46-49, 60, 63-64, 67, 71, 77, 86, 89-90, 108, 245  
 Gear's algorithm 218  
 geometrical feature 179-180  
 GGA (generalized gradient approximation) 240, 242-243, 245-246, 250, 252  
 Griffith theory 15  
 HRR singularity 17  
 HRTEM (high-resolution transmission electron microscope) 212  
 hydrothermal crystallization of colloidal precursors 177  
 ideal strength 82, 232-233, 236, 238-245, 250-252, 259, 271, 279  
 indentation test 50, 52, 56, 60, 64, 67-68, 77, 99-100, 215  
 in-situ observation 77, 149  
 instability 272-275, 277-280, 282-283, 286-290  
 instability criterion 272-273, 277, 279-280, 283, 287

- interatomic potential 8, 218-220, 271  
 interface 2-4, 7, 23-31, 37-38, 41, 60,  
     77, 83, 86, 97-102, 104-105,  
     107-125, 127, 133-153, 155-167,  
     169, 194-197, 200-201, 203-205,  
     211, 227-228, 265-268, 270-272,  
     282, 290  
 interface crack 23-31, 97, 99, 101, 104,  
     109-113, 115-116, 119-124,  
     133-134, 150-152, 155-156, 158,  
     161, 196, 200, 201  
 interface crack propagation 109, 111,  
     161  
 interface edge 27-30, 112-113, 133-143,  
     145-147, 149, 151, 153, 156-162,  
     165-166, 184-188, 194-197, 200,  
     204-205, 228, 265-268, 271  
 interface fracture 31, 97-99, 101-102,  
     104-105, 109, 118  
 interface fracture toughness 31, 97-99,  
     101-102, 104-105, 109, 118  
 interface strength 2, 28, 100, 107, 141,  
     158, 265, 271  
 interface toughness 97, 99, 100, 102,  
     114  
 internal structure 3-4, 237-238, 256  
 island 44, 133, 140-148, 183, 212-213  
  
 J-integral 16-18, 20, 22, 27, 31, 34-35,  
     114, 119  
  
 lattice instability 273  
 LDA (local density approximation) 253,  
     255, 257-258, 279  
 Lennard-Jones potential 220  
 line scratch test 100-101  
 loading mode 160, 271  
  
 LSC (large-scale creep) 20-22, 27, 30,  
     35, 119-120, 122-123  
 LSY (large-scale yielding) 34, 112  
  
 MD (molecular dynamics) 83, 85, 162,  
     211-212, 217, 219-221, 265-266,  
     283  
 mechanical instability 272, 275, 280,  
     283, 286  
 mechanical testing 6-7, 9, 45-46, 150,  
     212, 214  
 mechanical property 41, 46, 190  
 multi-layer cantilever bending 55,  
     73-74  
 multi-physics property 248, 259  
 MEMS (micro-electro-mechanical  
     system) 1, 7, 46-47, 108,  
     149-150  
 modified four-point bend experiment  
     111  
 molecular beam epitaxy method 178  
 Morse potential 220, 267  
  
 nano-cantilever 46, 77-79, 149,  
     152-153, 155  
 nano-cantilever bending 77-78  
 nano-component 1-4, 8, 119, 141,  
     148-149, 156, 158, 168, 211,  
     232, 238, 242, 271, 279  
 nano-element 5, 77, 83, 86, 175-176,  
     179, 182-184, 192-193, 199,  
     248, 249  
 nano-mechanical simulation 7  
 nano-mechanical testing 6  
 nanomechanics 41, 60  
 nano-scale material 41, 83, 237, 266  
 nano-structure 151, 237, 244, 249, 252,  
     259

- nanospring 184-186, 189-192, 195-196,  
     200-201, 203-205  
 nanotube 1, 176-177, 211, 214,  
     237-238, 244, 248, 252  
 nanowire 83, 177-178, 211, 236, 238,  
     244-249, 256-259  
 Norton's power law 120, 165  
 Nose's algorithm 218  
  
 Parinello-Rahman algorithm 219  
 PAW (projector-augmented wave) 253,  
     255, 257-258  
 peel test 109  
 phonon 220, 276-280  
 phonon dispersion relation 220, 276  
 phonon soft mode 277, 279  
 plastic deformation 5, 14, 26, 32, 41,  
     83, 89, 99-102, 105, 108, 112,  
     115-116, 118, 153, 160-161,
