

Index

- AFM, *see* atomic force microscope
amylin 131–36, 140, 142–48
amylin aggregates 132–33, 135,
 137, 139, 143–48
amylin aggregation 131–50
 human 134–35
amylin deposition 142, 144, 146
amylin oligomers, toxic 131–32,
 149
amylin particles 146
amylin polymerization 133, 141,
 146
amylin supramolecular complexes
 141, 145
amyloid 132, 150
 islet 132
anionic lipids 142, 144–45, 147
anionic membranes 140, 145, 147
antibodies 29, 158–59, 163,
 175–76, 182–83, 293, 298,
 356, 362
 anti-aPL 161–62, 164
antibody complexes 161–62, 164
antigens 163, 175, 215, 217, 219,
 228, 230, 356, 362
antiphospholipid syndrome 157
apo ferritin 94–96
arachidonic acid 187, 200
atomic force microscope (AFM)
 40–42, 55, 85–90, 94, 98–100,
 106, 110–12, 114–18,
 135–38, 143–45, 157–58,
 165, 321–23, 331–32,
 334–35
axo-dendritic synapse 46, 48, 53
basal secretion 68, 74–75
biomolecular interactions 85–86,
 88, 90, 92, 94, 96, 98, 100,
 102, 104, 106, 108, 110, 112,
 116–18
biosensors 356, 360–61, 363
brain 40, 42–44, 46, 48–49, 51,
 55–56, 58, 196–97, 213, 215,
 231–32, 360
brain ischemia 189, 194, 196–99,
 201, 207, 211, 213, 215, 217,
 219, 239–40, 245–46
 focal 197, 231
brain tissue 43, 47, 51, 197, 232,
 234
bulk iron oxide 259, 264, 266, 274

calcium 22–24
calcium oxalate monohydrate
 (COM) 86, 89, 106–7,
 109–10, 112–14, 118
calcium oxalate monohydrate
 crystal growth 85, 106–9,
 111, 113
cancer 294–95, 358–60
cancer cells 298–99
cardiac arrest 187, 189, 197–99
cell death 189, 203–4, 219
cell injury 190, 203, 205, 240–42,
 244
cell membranes 18, 112, 133,
 145, 159, 168, 280, 299–300,
 357–58

- cell plasma membrane 25, 56
 cell secretion 20
 cells
 metazoan 194, 196
 neuronal 26, 196
 renal 110
 cholesterol 139–49
 chromaffin cells 70
 COM, *see* calcium oxalate
 monohydrate
 complexin 24
 constant phase element (CPE) 351,
 353–55
 core neurons 217–18, 233
 CPE, *see* constant phase element
 cup-shaped porosomes 46–48
 Curie's law 268, 272–73
 cycloheximide 235–37
 cytoplasm 71, 194, 206, 212, 215,
 217, 222, 232, 238
- delayed neuronal death (DND)
 188–89, 198, 217–18, 231
 DND, *see* delayed neuronal death
- EIS, *see* electrical impedance
 spectroscopy
 electrical impedance spectroscopy
 (EIS) 341–43, 345–49, 356–
 57, 359–61, 363
 electron microscopy 40–42, 56–
 57, 205–6, 239
 emetine 236–37
 endoplasmic reticulum 188, 201,
 206, 219
 epithelial cells 106, 352
 renal 110
 exocrine pancreas 18, 41, 56
 exocytosis 18, 24, 64, 70, 74, 77
 extracellular environment 71, 74
 ferrofluids 276–79, 282–84, 301
 ferromagnetic structures 260–61
 ferromagnets 261–63
- gene delivery 299, 301
 gene expression 201, 203, 357
 genes 176, 192, 299
 homologous 173–74
 gold nanoparticles 292
- hair cell porosome 18, 20, 22, 24,
 26, 28, 30, 32
 hair cells 19–22, 24–29
 herbicides 361–62
 hippocampal neurons 219, 231
 hippocampus 43, 56, 58, 187, 198,
 217
 histidine-rich peptide (HRP) 323,
 328
 HRP, *see* histidine-rich peptide
 human amylin 134–36, 139, 142,
 148
 human islet amyloid polypeptide
 131–32
 human prion proteins 86
 hydroxyapatite 85–86, 114–15
 hydroxylchloroquine 160
 hyperthermia 258–59, 279, 281,
 284, 294–95, 301
 hypokinetic stress 50–52, 55
 chronic 40, 42, 51, 55, 57
- impedance spectroscopy 343–44,
 355, 362, 364
 electrical 341–43, 363
 iron nanoparticles 267
 iron oxide 259, 261–62, 269, 276,
 283, 292

- iron oxide nanoparticles 258–59, 264–69, 271–80, 282–84, 286–301
 iron oxide samples, nanoscale 264–65
 ischemia 188–89, 196–201, 204, 206, 210, 217, 222, 224, 230–32, 234–37, 239–40
 focal 196, 217, 221, 231
 global 196–98, 204, 218, 231
 ischemic brain injury 199, 245–46
- kidney 197
- Madine Darby canine kidney (MDCK) 351–52
 magnetic fields 260, 268, 273, 278–80, 285, 294, 296, 300
 magnetic hyperthermia 284, 294, 297
 magnetic hysteresis 262–63, 266
 magnetic nanoparticles 258–59, 266–67, 269, 272–74, 279–80, 284, 293–95, 299–301
 magnetic relaxation 259, 281, 283–84
 magnetic resonance imaging (MRI) 258–59, 284–85, 294, 297–98, 301
 magnetite 259, 261, 264, 290
 magnetization 260, 262–63, 265–66, 268–70, 272–73, 278, 285–86, 289
 mast cells 65
MCAO, *see* middle cerebral artery occlusion
MDCK, *see* Madine Darby canine kidney
 membrane cholesterol 139
 membrane elasticity 144, 300
- membrane fusion 20, 24, 65–66
 membranes, postsynaptic 27–28, 46, 48
 mica 93–94, 98, 104–5, 135–38, 140–41, 143–46, 325
 middle cerebral artery occlusion (MCAO) 188, 215, 232
MRI, *see* magnetic resonance imaging
 mRNA granule formation 231, 236–37
 mRNA granule-containing neurons 233
 mRNA granules 189, 221–40
 mRNA regulation 189–90, 192–93, 195, 199, 210, 222, 237–38, 246
 mRNA staining 221–22, 227
 mRNAs 189–90, 192–95, 203, 205, 207, 211–13, 219, 221–22, 224, 227–28, 237, 239
 stress-induced 205, 237–39
 mRNPs 193–95, 212
- nanoparticle endocytosis 299–300
 nanoparticle interaction 267, 282
 nanoparticle moments 270–75
 nanoparticle synthesis 258, 272
 nanoparticles, monodisperse 281, 288
 necrosis 189, 217–18
 Neel relaxation 278, 280–81
 neofunctionalization 176–78
 neuronal death 189, 198, 230, 235
 delayed 188–89
 neuronal porosome, synaptic vesicle-free 54
 neuronal porosome complex 39–40, 42, 44, 46, 48, 50, 52, 54, 56, 58
 neuronal porosome complexes 47–48, 54

- neuronal porosome structure 39, 57
 neuronal porosomes 40–43, 45–49, 52–53, 55–58
 neuronal vulnerability 207
 neurons 18, 20–22, 25, 40–41, 56–57, 189, 198–206, 210, 213, 215, 223, 225–26, 232, 234–35, 237–40
 distorted 233
 neuroporosome structure 42, 58
 neuroprotection 189, 198, 231
 neurosecretion 18, 24, 30
 neurotransmitter release 18, 20, 41
 NICs, *see* non-ischemic controls
 NLS, *see* nuclear localization signal
 non-fibrillar aggregates 101–4
 non-ischemic controls (NICs) 188, 216, 222–26, 228–29
 nuclear localization signal (NLS) 323, 328–29
- oligomers 93, 95–98, 101–3, 136–37, 145, 147, 149
 organelle markers 227–28
 osteopontin 110
 otoferlin 19, 22, 24, 31
- pancreatic acinar cells 25, 65
 pancreatic β-cells 132
 PCS, *see* photon correlation spectroscopy
 PDI, *see* protein disulfide isomerase
 phosphatidyl choline 139–43, 145–46, 159
 phospholipids 24, 146–48
 phosphorylation 110, 207, 211
 plasma membrane 18, 20–21, 23, 28, 64, 71, 148, 353, 355
- plasmid DNA 323–24
 polymers 277, 288, 291–92, 296–97, 323
 bioreducible 323–24
 thermosensitive 296
 polyplexes 324–30, 332
 polysome dissociation 207, 211–12, 236–37
 polysomes 205–6, 236
 porosome complexes 29, 43
 porosome morphology 41–42, 50
 porosome proteins 29
 porosomes 18–19, 24–25, 27–30, 39–43, 46–53, 55–58, 67
 cup-shaped lipoprotein 39
 hair-cell 19, 25, 27, 29
 vesicle-free 48, 54
 post-ischemic neurons 189–91, 195, 201, 203–4, 207–10, 213, 222, 231, 246
 protein aggregates 105, 188, 201, 210, 213, 220
 protein aggregation 95
 protein antigenicity 218
 protein damage 201
 protein disulfide isomerase (PDI) 188, 219, 227
 protein epitope analysis 175
 protein evolution 174, 177, 181–83
 protein expression 195
 protein monomers, prion 103
 protein particles 93, 98
 protein secretion 70
 protein structures 174–75, 182
 protein synthesis 203
 proteins 19–23, 41, 55–56, 94–95, 97, 110, 173–77, 180–83, 192, 194–95, 203–4, 217–19, 221, 227–28, 238–39
 homologous 175
 mRNA-binding 192, 211–12, 222
 secretory 69
 t-SNARE 21–22, 30
