

# Index

- acid-buffering 252–253  
acrylic acid 11, 13, 15, 32–33, 41,  
239–241, 249, 253  
active pharmaceutical ingredient  
(API) 25  
adhesion  
anisotropic 85  
cell-to-cell 3–4, 8–9  
principles of 4–5, 7  
reversible 57, 138, 168  
shear 91–92, 141  
tissue 208–209, 211–212,  
214–216, 220  
adhesion energy 59  
adhesion force 31–32, 57, 59,  
92, 184, 195  
adhesion prevention 273  
adhesion strength 69, 71, 140,  
170, 174, 181–183, 209,  
211, 213–216, 220–221  
adhesive coacervates 123  
adhesive hydrogels 40, 69–70,  
140  
adhesive pads 86, 102–103  
adhesive plaques 50, 52, 151–152  
adhesive polymers 118, 132, 136,  
142  
adhesive protein 53, 56, 74, 110,  
116–120, 122, 131  
adhesive sealants 203, 215, 221  
adhesives  
dental 15, 74  
directional 183, 185  
sensitive 14, 103  
wet 10, 14  
AFM, *see* atomic force microscopy
- albumin 15, 32, 40, 214–216, 250  
algae 146, 168–169, 173, 176, 221  
brown 168–169  
algal glue 168–169  
algal glue mimetics 167–176  
alginate 37, 40, 55–56, 137, 170,  
172–174, 213, 218, 254  
alginate gel 172–174  
antibacterial agents 276–277  
antibacterial surfaces 150,  
274–275  
antibiotics 218, 273, 277–278,  
280, 282–284  
antifouling polymers 72, 135,  
144–145, 148–149  
antimicrobial agents 271, 273,  
278, 280, 284  
antimicrobial peptides 271, 273,  
277–278, 280, 283–284  
API, *see* active pharmaceutical  
ingredient  
atom transfer radical  
polymerization (ATRP) 72,  
147  
atomic force microscopy (AFM)  
35–36, 42, 50, 54, 56–57,  
60, 62–63, 74, 93, 115  
ATRP, *see* atom transfer radical  
polymerization
- β-keratin 88–89, 91, 97–98,  
101–102, 182, 185  
bacterial adhesion 271–278, 280,  
284–285

- prevention of 275, 280
- bacteriophages 273, 281
- bio-inspired adhesive polymers 118–119
- bio-inspired surfaces 181–199
- bioadhesion
  - characterization of 23–42
  - examples of 4, 8–15
  - principles of 1–21
- bioadhesive films 27, 258–259
  - peel strength of 28, 259–260
- bioadhesive ophthalmic drug 252
- bioadhesive polymers 242, 249, 253, 255
- bioadhesive retentive system 255
- bioadhesive systems 26–27, 235–268
- bioadhesive systems for drug delivery 235–260
- bioadhesiveness 40, 42
- bioadhesives 4, 14, 16, 49, 63, 203–222, 252
- biofilm formation 269, 271–274, 277, 280–285
- biofilms 247, 271, 279, 282–284
- BioGlue 15, 206, 214–215, 220
- bioinspired synthetic adhesives 138–139, 141, 143
- biologic scaffolds, adhesive-coated 142
- biological substrates 132–133, 135, 236, 242
- biomimetic adhesives 71, 122, 140, 142
- biomimetic algal glue 172–173, 175
- biomimetic glue 173, 175–176
- biomimetic materials 67–68, 74
- bonds
  - bioadhesive 7, 25
  - strong adhesive 8, 11
- bone 4, 16, 113, 123, 132, 149, 269
- bovine thrombin 207–208, 210
- byssal plaque 51–52, 54, 57, 64–65, 67
- byssal threads 51, 70
- byssus 49–50, 52, 55, 67
- byssus threads 64, 134, 151–152
- cadherins 9–10
- catechol 55, 63, 68–74, 119, 122, 133–142, 145–147, 150–151
  - adhesive 138–140
- cell adhesion 3–4, 8–10, 148, 274
- cell adhesion specificity 10
- cells
  - basal 237–238, 249
  - goblet 236–238, 251
- chitin 216
- chitosan 11, 32, 36, 38, 40, 70–71, 137, 206, 216–218, 240–241, 250–251
- chitosan-based sealants 216–217
- circular dichroism 56
- CLSM, *see* confocal laser scanning microscopy
- collagen 10, 15, 51–52, 54, 123, 205, 208, 210–213, 215–216, 218, 220
- collagen sealants 209–212
- colon 253, 255–256
- colonization 269, 272–273, 275, 281, 285
- confocal laser scanning microscopy (CLSM) 35, 113–114
- corneal epithelium 238, 251
- delivery systems
  - bioadhesive 249, 254, 256
  - mucoadhesive 29, 245–246, 248, 254–255
  - oral mucoadhesive 245–246
  - dentine 4, 15–16

- devices, prosthetic 283–284  
 3,4-dihydroxyphenylalanine (DOPA) 52–57, 60–72, 110, 116–122, 131–134, 138, 145–147, 151, 211, 221  
*DOPA*, *see* 3,4-dihydroxyphenylalanine  
 DOPA bidentate hydrogen bonding 61–62  
 DOPA chemistry 62, 68, 132  
 DOPA-deficient foot proteins 65  
 DOPA ligands 55, 65–66  
 DOPA-mediated underwater adhesion of mussel proteins 61  
 DOPA oxidation 60–61  
 DOPA residues 57, 116, 120, 135, 211  
 DOPA side chain 131–133, 135, 151  
 dopamine 51, 68, 71–72, 131–133, 135, 137, 141, 146–147, 149–151  
 dopaquinone 54, 60, 63–64, 66  
 drug delivery  
   buccal 246  
   mucoadhesive 14, 24–25, 237, 239, 260  
 drug delivery systems  
   bioadhesive 26, 37, 235–236  
   mucoadhesive 25, 237, 239, 260
- enzymes 69, 69, 135, 151, 211, 236, 249, , 278–279, 282, 285  
 epithelium 237–238, 245, 248–249, 251–252, 255  
 essential oils 283  
 ethylene glycol 15, 32, 63, 73, 122, 137, 147, 213, 240, 244  
 fibrin-based adhesives 138, 205  
 fibrin-based sealants 206–209, 220  
 fibrin glue 69, 138–140, 142, 213, 218–219  
 fibrin sealants 14, 206–210, 219  
   patient-derived 219  
 fucus glue 170, 172–173  
*Fucus serratus* 170–172
- gastric retention formulations (GRFs) 256  
 gastrointestinal tract 8, 10, 17, 24–25, 236, 255–256  
 gecko adhesion 85–88, 90, 102–103  
 gecko movement 88, 99–100  
 gecko pad 87–91, 94, 97, 99, 101–102  
 gecko setae 87, 182  
 gecko's foot 86–87, 94, 103  
 gelatine 14, 206, 209–214, 220  
 gelatine-based sealants 211  
 glutaraldehyde 206, 213–214  
 glycine 115–117, 120, 146, 151  
 GRFs, *see* gastric retention formulations
- haemostasis 208–213, 217, 219–221  
 hybrid gecko- and mussel-inspired adhesive 143  
 hydrogels 15, 40, 69–71, 13, 140–141, 221, 244, 257  
 mucoadhesive 257  
 hydrophilic surfaces 102, 173, 272
- infections, medical device 273, 278, 285

- interactions  
catechol-surface 133  
mucus-polymer 32  
interfacial binding 131–133, 135,  
140, 146
- Kendall model 96, 98
- laser tissue welding (LTW) 215  
lectins 9–10, 16–17, 242, 260  
*LTW*, *see* laser tissue welding
- MAPs, *see* mussel adhesive proteins  
marine mussels 68, 70, 73  
metal oxide surfaces 133–134  
microbial adhesion 269, 273, 285  
microorganisms 17, 271–272,  
275–276, 279–280, 282,  
284–285  
adhesion of 17, 271  
mucin 11, 31–34, 36–40, 63, 132,  
236, 244, 246, 257–258  
viscosities of 31–32  
mucin glycoproteins 236  
mucoadhesion 4, 10–13, 24–25,  
27–31, 33–34, 36–37, 40–42,  
236–237, 242–245, 251, 253,  
256–258  
factors affecting 236, 242–243,  
245  
measurement of 30, 31, 38  
mucoadhesion analysis 33  
mucoadhesive polymers 11, 27,  
32–33, 38, 40–41, 239, 241,  
250–252, 260  
mucoadhesiveness 26–27, 35, 40  
mucosa 4, 8, 12, 30, 37–39, 42,  
219, 236–239, 245–246,  
248–249, 256
- mucus 4, 10–13, 29–33, 36,  
38–40, 42, 236–238, 240,  
242, 245–246, 249–252,  
255, 257, 274  
cervical 238, 252  
mucus gel 12–13, 30, 32, 34, 236  
mussel adhesion 50, 52, 54, 57,  
60, 64
- mussel adhesive proteins (MAPs)  
74, 131–132
- mussel adhesives 49–52
- mussel byssus 49–50, 52, 55, 134
- mussel foot 51–52, 54, 55, 59–60,
